Application/Limitation

The protocol version one of the TTD message cannot be implemented in all details according to IEC 61162-1 (2016), Clause 8.3.100 because of the prescribed number of bits. In addition, the way of implementing and interpreting negative values is not clearly enough prescribed in this test standard.

Following implementation has been tested and verified deviating from the above mentioned clause.

- CPA: same as parameter "Distance" of protocol version zero
- TCPA: implemented as two's complement, i.e. -81.92 for invalid or N/A values and valid values between -81.91 and +81.91

Tests carried out

- Environmental and EMC testing: EN 60945 (2002) incl. Corrigendum 1 (2008)
- Interface testing: EN 61162-1 (2016) and EN 61162-2 (1998)
- Presentation testing: EN 62288 (2014)
- Performance testing: EN 62388 (2013)

Notes:

1. For interface testing of TTD protocol version one see statement under Application/Limitation.
2. If compliance with IEC 62923-1 (2018) and 62923-2 (2018) is demonstrated, validation of certificate to be extended to 2025-09-16.

Marking of product

According to IEC 60945, Sect.4.9:

The product to be marked with following information, where practicable:

- Identification of the manufacturer,
- Equipment type number or model identification under which it was type tested,
- Serial number of the unit,
- Compass safe distance.

Alternatively, the marking may be presented on a display at equipment start-up, and in case of fixed equipment compass safe distance may be given in the equipment manual.

According to Article 10 of the Council Directive (MED):

- Wheel mark to be affixed visibly, legibly and indelibly to the product or to its data plate and, where relevant, embedded in its software. Where that is not possible or not warranted on account of the nature of the product, it shall be affixed to the packaging and to the accompanying documents.
- Wheel mark to be affixed at the end of the production phase.

For specific products, manufacturers may use an appropriate and reliable form of electronic tag instead of, or in addition to, the wheel mark.
